Consultation Questionnaire Exemption No. 4(f) of RoHS Annex III

Dear Sir or Madame.

Regarding the Consultation Questionnaire Exemption No. 4(f) of RoHS Annex III please find here our answers to best of our knowledge.

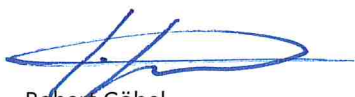

We are a solutions provider and merchant for air cleaning technologies which are based among other things on UV-C lamps.

During the current covid-19 pandemic but also moreover that is the need of the air cleaning technologies important. Air purifier devices with UV-C lamps have several benefits:

- lower maintenance interval than other technologies
- easy to handle for the customer instead for e.g. contaminated filters
- more less waste because it is not needed to replace any filter in a specified interval
- since of beginning of the corona pandemic are air purifier an essential part of the hygienic concepts, to bring safety back into the normal rooms
- All available alternatives like UV-C LEDs are currently not a useful replace UV-C mercury lamps

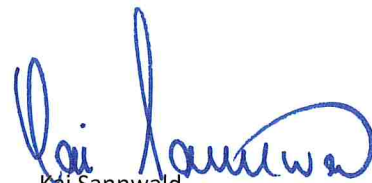

With focus of on the current covid-19 pandemic is it not helpful to ban a well working technology which makes stay indoors, living, working, etc. more safety.

Mit freundlichen Grüßen/ Best regards
